**Quarter Turn Cam Latches**

An ideal fastener for gasketed doors and access panels subject to wide thickness or misalignment tolerances. Grip length is variable from 1/8" to 1 1/16" and is set by rotating the center spindle. The DPL-106-KB grip length can be adjusted by hand and the DPL-106-AB grip length is set with a screw driver. The latch can be opened with a quarter turn of the outer ring. Made of steel with black plastic outer ring. Panel thickness .048" min. to .128" max. Installation hole diameter is .765". Installation instructions included.

**Explosion Proof Latches**

These pressure release latches provide venting in the event of internal explosion and maintain a seal in order to prevent loss of heat and/or escape of gasses under normal conditions. Latches have an adjustable strike and the release force is adjustable. EP-22 is cast iron and EP-32 is investment cast steel. Instructions included.

**Arrowhead Adjustable Grip Latch**

Arrow designates position of the cam. Latch operates through 90 degree rotation with a positive click stop at both extremes. Use in either clockwise or counterclockwise applications. Panel thickness ranges from .063 to .188. Knob height is adjustable. Grip range .16 to 1.11 with cam reversed. Made of low carbon steel with aluminum ferrule and stainless steel mounting nut, spring, pin and washers. Knob is black nylon. Shaft thread size is 6-32 UNC.

**Low Profile Cabinet Latches**

Designed mainly for use on light cabinet doors and panels. A distinctive "snap" lets user know that the latch is fully open or fully closed. The dead bolt latches each come with a hex nut for mounting them to a door or panel. The cam is held in place with a lock washer and screw. Plug barrel and hex nut are zinc die cast. Cam, lock washer and screw are made of steel. Nickel plated finish. Hex accepts 1/4" hex tool. For use on panels up to 1/4" thick. Cams are straight.

# DRAW LATCHES & KEEPERS

Buy One or Buy Bulk & SAVE

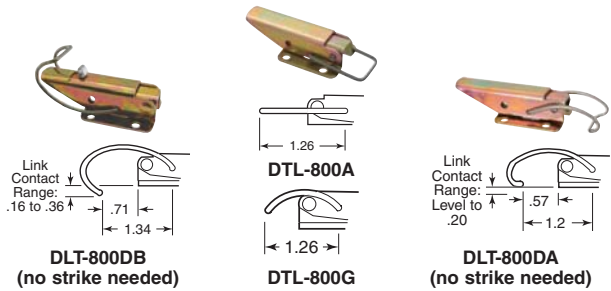

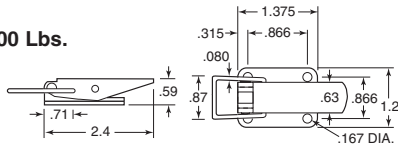

These versatile, medium size toggle latches are built for tough use on chests, cabinets, etc. Steel latches and strikes are zinc plated with a bright chromate finish. Stainless latches and strikes are made from Type 300 series stainless. All mounting holes on latches and strikes will accept .156" dia. rivets or #6 round head screws. Latches that do not require strikes are designed to latch on notches, corners, lips, etc. The secondary latch prevents accidental opening. **Note:** Strikes are not included with the latch and must be purchased separately.

## Snap-In Magnetic Catches

Catch

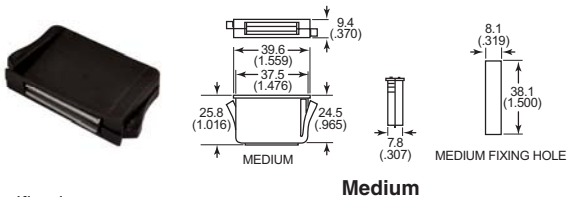

Strike

Mounting Bracket

Push to close, pull to open. The snap-in magnetic catch is made of black polypropylene with 1010 zinc plated steel metal parts. Magnet is barium ferrite. Easy snap in installation into 1.5" x .32" punched hole. A mounting bracket is available for the SC-021 for applications where the frame is not suitable for punching. Mounts with two #4, #5 or M3 screws. Self adhesive steel strike is 1.25" x .75" x .09". Strike and mounting bracket not included and must be ordered separately.

AI-1022	C301-22D	22	22.88	130	1	20

**Full Extension Drawer Slides****Two-Way Travel Slide****Medium Duty**

Two-way travel provides access from both sides of installation. Full extension from center point for complete access to contents. Hold-in detent at center to keep conveyances in position until use. Non-disconnect to ensure conveyances cannot be removed. Used for kitchen islands, dining or entertainment bars or other cabinetry that benefits from two-sided access. Made out of steel with a bright electro-zinc finish.

*Accuride*

AI-8030	C0363-28P	27.55	29	58	88	1	20

All slides are unhardened. Bright zinc finish with steel ball bearings. All have traditional hole patterns except where noted otherwise.

**Drawer Slide Selection**

1) Measure length of drawer from back of drawer front to rear of drawer. 2) Select travel length desired. 3) Determine slide height and drawer side clearance requirements. 4) Determine detent, lock-out or lock-in and disconnect requirements.

**Heavy Duty**

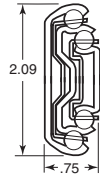

Used for file cabinets, utility and industrial truck storage, machine tool drawers, generators and heavy mechanical devices

**KNOBS, HANDLES  
& GRIPS**

Pages 10 - 119

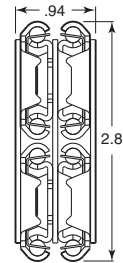

These ball bearing drawer slides are made entirely from type 304 passivated stainless steel. They are most commonly used in applications needing corrosion resistance such as laboratories, humid/damp environments, marine applications, and clean rooms. The slides have a bright finish, tight tolerance, quiet operation, and smooth glide. All slides on this page are side mounted drawer slides.

**Full Extension****Full Extension Drawer Slides  
Non-Disconnect Medium Duty  
Stainless Steel**

Positive stop slide that once installed will not disconnect. Requires 16 #8 Pan Head or M4 screw (not included).

General Duty

Heavy Duty

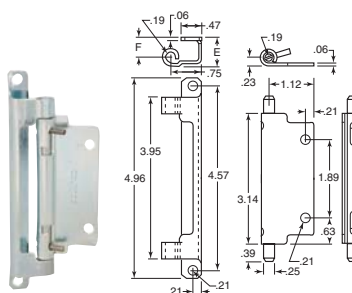

Extra Heavy Duty

Dual purpose latch hinges are ideal for lid or door latches, or easily removable hinges. The spring loaded, chamfered pin holds securely, whether used as a latch or hinge. Steel has a zinc finish. Stainless is Type 303 stainless steel. No holes included except on heavy duty latch hinges. Extra heavy duty can be used left handed or right handed. Available left or right handed. Left handed pictured.

**Spring Release Hinges**

Front View

Side View

Door comes right off with the spring release hinge. It is a quick release hinge that can be mounted in any position and requires no tools to take the hinge off. An easy squeeze of the knurled knob retracts the spring loaded pin from the knuckle to release the leaf. Precise manufacturing standards eliminate excess side and end play from minimum door movement. Type 300 series stainless steel. Leaf thickness of .050".

Lid Stays  
304 Stainless Steel  
Satin Finish

Made from 304 stainless steel with satin finish, these lid stays are strong (only one stay per lid required - 33 lbs. load capacity). Holds lid or panel in fully opened position. Lift up lid to release.

Cover Stays  
Heavy Duty

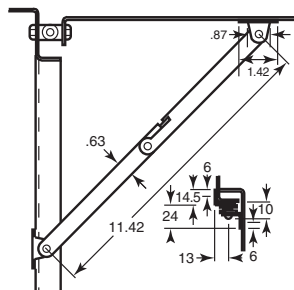

Telescopic cover stay uses either cam action or push button. Used to hold covers up. Metal catch provides positive locking in the fully extended position. To release the catch, simply raise the cover and the metal catch is released, allowing the cover to be closed. Made from heavy duty steel, zinc plated. Door angle is optional.

Door Stops  
Steel or Stainless Steel

Holds door open at specific angle and prevents door from opening too far. When door is open fully, catch will hold door in place. To release door, push open slightly and catch is released. Available in zinc plated steel or Type 304 stainless steel. Opening angle is determined by "X" and "L" dimensions.

**APGAS Series  
Weather Stripping/Gaskets**

## Specifications:

- Adhesive: Permanent rubber-based pressure sensitive adhesive
- Material: Closed cell blend of neoprene nitrile and PVC
- Service Temperature: -20° F to 150° F
- Density (lb/ft<sup>3</sup>): 4 to 7
- Compression Deflection: 2 to 5 psi
- Flammability: FMVSS 302 UL94 HF-1 ≥ 1/8"

**Flat Gasket**

Gaskets are used in sheet metal fabrication to seal doors, and many other applications where sealing are a necessity. These gaskets meet NEMA 12 to NEMA 4X applications. They are easy to install due to the self adhesive backing, increasing its economical use. These gaskets can easily be cut to size and shape to fit many applications. These gaskets also come with fiber backing which eliminates stretching, helping to maintain seal and stay in position.

**Weather Stripping  
Poron® High Density Urethane  
Adhesive One-Side  
Continuous Roll**

## Specifications:

- Adhesive: Rubber with a film carrier for non-stretch characteristics
- Service Temperature: - 20°F to 150°F
- Density (lb/ft<sup>3</sup>): 15
- Compression Deflection: 4 - 8 pounds per square inch
- Compression Set (50% max): 10% max
- Flame retardant

## Applications:

- Ideal for gasket applications requiring low compression set
- Electrical enclosures
- HVAC enclosures
- Lighting fixtures
- Metal-to-metal sealing
- Vibration dampening
- Cushioning

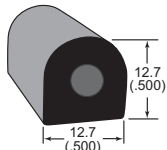

Closed-cell foam that exhibits very low compression set, good shock absorption performance and low out-gassing.

**PRGAS Series  
Profile Gasketing**

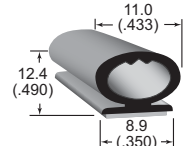

Type 1

Type 2

Type 3

Type 4

**Features:**

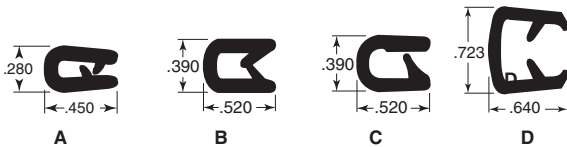

- Recommended for a maximum 25% - 50% compression
- Suitable for indoor or outdoor application
- Excellent resistance to water adsorption, ozone and UV aging

**Specifications:**

- Material: EPDM Foam Rubber with adhesive backing
- Temperature Range: -20° to 150° F
- Flammability: FMVSS 302 & UL 50
- Adhesive is a Pressure Sensitive Acrylic
- Mating surface should be free of contaminants and cleaned prior with denatured alcohol

**Window Seals  
Black Rubber  
Nema 12 Rated**

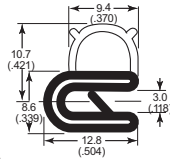

Allows a quick and efficient way to attach windows to frames. NEMA 12 rated safe for water or outdoors. The window profile is made from soft rubber, EPDM material, 70 degree shore. The locking strip is made from EPDM 85 degree shore. In order to safely attach and seal the window to the frame the locking strip must be used. The locking strip is included. Color is black. ELH-610 includes two tools: one window tool and one locking strip tool.

**Gasket Cutters**

Gasket cutters have phenolic bodies with quick set indicator for precise measurement in both metric and inch. Top knob locks extension arm in place for precise pivoting. Exclusive design provides ironing action to prevent material as thin as .001" from buckling. Kits come with a cutting work board with center and corner ferrule, spring loaded pin handle for quick and easy insertion of pivot pin and three thin blades and three thick blades for cutting various thicknesses.

**ZM-10 Deluxe Gasket Cutting Kit** - includes two extension arms for cutting from 1" up to 37" round, and four pivot pins for cutting up to 3/4" thick materials. Dovetail designer so you can cut flanges in material smaller than the required gasket size. 18" square board.

**ZM-11 Economy Gasket Cutting Kit** - includes one extension arm for cutting from 1" up to 25" round, and two pivot pins for cutting up to 1/2" thick materials. 12" square board.
